BioMat Sessions

The *BioMat* is a pad, which lies on top of a massage table or your home mattress. It converts electricity through a computerized control panel that filters electric into Far Infrared Rays and **blocking** harmful electromagnetic frequencies. Far Infrared was discovered by NASA to be the **safest, most beneficial light wave for the body**; it helps reduce swelling, increase blood flow. Cancer centers in Japan have been utilizing the BioMat for the **treatment of cancer** and viral cells **without harming surrounding** healthy **tissue**. It penetrates 6-8 inches into the body, stimulating healing and **regeneration** of nerves and muscle tissue layers. The negative ions emitted by the BioMat are considered the master power switch, which activate the body's entire cellular communication system and make **every body function work better**. The amethyst crystals in the upper layer of the mat are found to offer the steadiest and most **powerful** delivery of healthy far infrared light waves.

What is far infrared and how does it help me?

Far infrared is the **healthiest** part of the spectrum of light emanating from the sun we can absorb. It is not visible to the eye, but you feel it as heat **penetrating** into your skin.

How do negative ions help me?

- purify blood (removal of free radicals)
- oxygenate the blood
- improve immune system function
- control and balance the autonomic nervous system
- vitalization of cell metabolism
- purifies the air (great for those who live in apartments, or near freeways!)
